# Unzipping a resource

The following instructions demonstrate unzipping a zipped resource on a Windows PC. **Note**: Mac OS automatically unzips the resource upon download.

Before unzipping a resource you first need to save the file to your Windows PC.

1. **Right click** on the zip file you want to download.
2. Select '**Save target as…**'

3. Choose a location on your PC to **save** the zip file.
4. Select **Save**

To extract the files

1. **Right click** on the file you just downloaded.
2. Select '**Extract All…**' from the drop-down menu that appears.

3. Click the **Browse** button and choose a location to save the files on your PC.

4. **Check** the box next to 'Show extracted files when complete'.
5. Click **Extract**

The files will be extracted to your PC.

Once extracted, a new window will open containing a folder with the same name as the zipped file.

Select and open the '**files**' folder to locate the extracted files.
