STEM Japan Global Student Program

The STEM Japan Global Student Program offers Queensland Year 10 students an exciting opportunity to be immersed in innovative experiences, develop their language skills and engage with the rich culture of Japan.

Participants will engage in industry visits and hands-on activities that highlight Japan's advancements in Science, Technology, Engineering and Mathematics (STEM) fields to deepen their understanding of the practical applications of these disciplines in a different country. Participants will also delve into Japan's rich historical and cultural heritage, visit significant sites and landmarks, and experience Japanese school life at local high schools.

Through this program, participants not only gain a deeper appreciation for both STEM disciplines and Japanese culture – they also cultivate the knowledge, skills and cultural awareness needed to thrive in an increasingly interconnected world.
