STEM Taiwan Global Student Program

The STEM Taiwan Global Student Program offers Queensland Year 10 students an exciting opportunity to be immersed in innovative experiences, develop their language skills and engage with the rich culture of Taiwan.

Participants will engage in industry visits and hands-on activities that highlight Taiwan's advancements in Science, Technology, Engineering and Mathematics (STEM) fields to deepen their understanding of the practical applications of these disciplines. Participants will also delve into Taiwan's diverse cultural heritage and experience Taiwanese school life at a local New Taipei high school, where they will practice and develop their language skills through participation in a variety of classes and activities.

Through this program, participants not only gain a deeper appreciation for both STEM disciplines and Taiwanese culture – they also cultivate the knowledge, skills and cultural awareness needed to thrive in an increasingly interconnected world.
